Dear Chairman Gleason and Commissioners:

RE: Dever-Palo Verde No. 2 Transmission Line CEC

I urge you to deny the CEC.

I just can not believe the Siting Committee would double the mistake made in the approval of the first line. It looks like pressure of some sort was applied to have the regional US Fish and Wildlife director overturn the decision of the refuge manager. Certainly you must agree that the man on the ground has the best understanding of the area.

We in Arizona are so lucky to have the Kofa National Wildlife Refuge let's not fragment it with another transmission line which will have profound impact on the dwindling big horn sheep population as well as affecting some of the other birds, mammals, reptiles and amphibians.

The proposed line will not help Arizona or Arizona tax payers. Certainly a location outside the Kofa Refuge is possible.

William Kurtz
